Maintaining the Appearance and Integrity of Kilties that Adorn Men's and Women's Dress Shoes

Men's and Women's shoes are sometimes adorn with kilties. A kiltie is a long slashed tongue on boots and shoes; kilties are generally made of leather. Due to wear and aging the kiltie tends to curl up, this device will restore the kiltie to its original appearance applying pressure from the top due to the hinging mechanism, also restoring the tassels to their original appearance.

This invention can be attached to existing plastic or cedar shoetrees during manufacturing or by the consumer. This invention is to be used during shoe storage.
